MADE IN INDIA

## PROBLEM

## SOLUTION

## ADVANTAGES

### 1. No-Clutch Function

Like an automatic transmission vehicle, start and stop can be conducted only by the accelerator and brake system without using the left foot as much as manual geared vehicles. Therefore the physical effort is reduced while driving.

### 2. Interchange of Manual and Automatic(Multi-Function System)

Whenever the clutch-pedal is pressed down, it changes to manual state. Hence, the manual system and automatic system are interchangeable.

### 3. Economic-Viability and Environmental Concern

The fuel consumption is similar to an ordinary manually geared vehicle, which means that the fuel consumption rate is 20%-30% lower than the automatic transmission one. Therefore it is more economically viable. Along with this advantage, the air pollution due to automobile exhaustion is reduced, contributing to the environmental protection.

### 4.Target Vehicles

Installation is possible in all kinds of manual-gearred vehicle (cars and light duty vans etc.)

## AUTOMATIC CLUTCH PEDAL CONTROL SYSTEM (ACPCS)

Innovative CLUTCH Control gives your left foot a break

**AUTOMATIC or MANUAL?**  
**Why not to have Both!**

With CITY CLUTCH, you can convert  
any Manual Car into Semi-Automatic  
car, just by a single button.

NEW DIGITAL TECHNOLOGY MICROPROCESSOR BASED

**Now it's More Easier to Drive a CAR with ACPC SYSTEM**

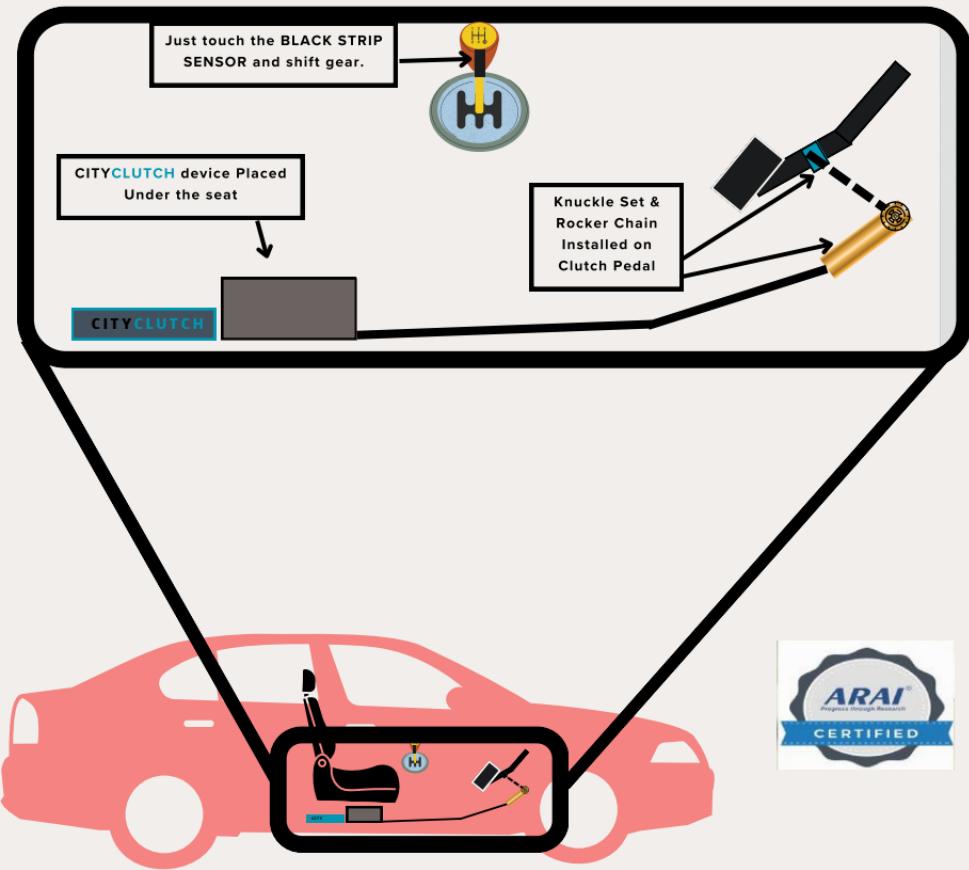

## DURABILITY

The components of the CITY CLUTCH automatic clutch system are subject to minimal wear and tear, with replacement parts inexpensive and readily available. Installation and proper service of a CITY CLUTCH will in no way bring about premature wear of the clutch pad; on the contrary, due to its tight microprocessor controlled engagement of the clutch, users may even see a slight increase in pad life.

## BEST SELLING PRODUCT

Our best Selling product is the AUTO-Clutch – automatic transmission at an affordable cost. This patent product has been evolved over twelve years of Research & Development and is under constant improvement, keeping abreast with the changes in modern automobiles. Hundreds of cars fitted Free Demos & Free RFQ No Appointment Necessary Service on call 1 Year Warranty on kits Serving India for more than a decade Lifetime association

# INSTALLATION OF CITYCLUTCH DEVICE

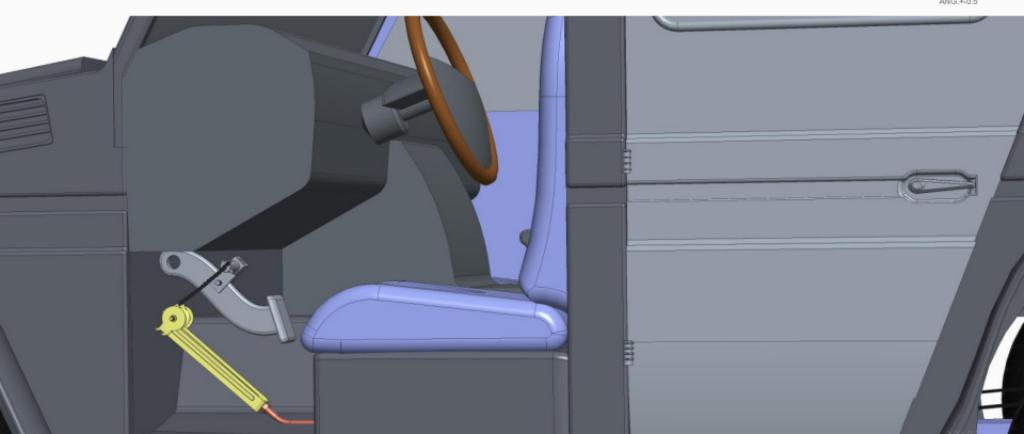

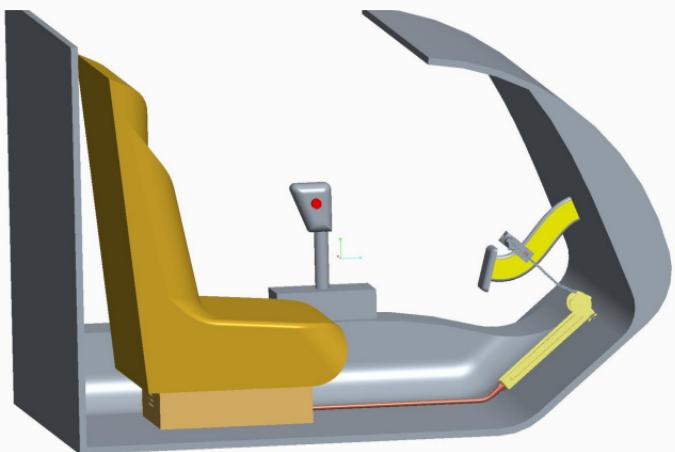

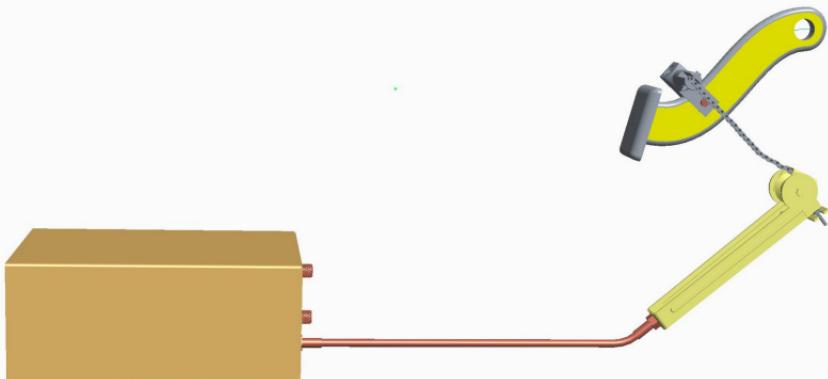

**CITYCLUTCH** Device is a Externally Fitting Device.

**CITYCLUTCH** Offers Many Customisable Tuning Settings option ,As per your Driving Habit.

It doesn't Harm any car Originality without any Major Alteration.

Hence it Doesn't Void any Car Existing Warranty Given by the Company.

# | KEY BENIFITS

- Change gear without using your Foot to operating the clutch.
- Less Physical Stress.
- Transferable to your next car.
- Easy to use.
- Can be switch OFF or ON even while driving.
- Crawls like an automatic transmission.
- Available for all types of Cars and Light Duty Van.
- More Fuel-economical than an Automatic Transmission.

# | INTELLIGENT MANUAL TRANSMISSION (IMT)

NEW DIGITAL TECHNOLOGY  
MICROPROCESSOR  
BASED

# F.A.Q.

## Do I have to change gears myself?

-Fortunately yes, leaving you in control of your own driving style.

## Will any modifications be made to my car?

-CITY CLUTCH can be installed without any modifications to your car's system. The only alterations are that a number of attachment points are introduced for the installation of components. A Switch is installed in the gear lever knob and a number of wires are routed to the brake switch, accelerator pedal, handbrake and road speed sensor.

## Can I still operate the clutch pedal manually while CITYCLUTCH is on?

-Yes you can operate the clutch pedal manually, even when CITY CLUTCH is on.

## What happens during an emergency stop?

During braking CITY CLUTCH will ensure that the engine remains coupled in assist the deceleration process, and automatically disengages the clutch just before the car comes to a complete stop. The engine will therefore not stall. Thus, behaving in exactly the same manner as you are accustomed to.

## Can CITYCLUTCH be switched off?

-Yes it can. There is an On/Off switch. This can be switched on or off even while moving.

## Will CITY CLUTCH result in higher clutch plate wear?

-No. CITY CLUTCH has a balanced method of clutch engagement, clutch plate wear for an average driving style is certainly no more than for normal use.
